

Data Scientist

Strategist & Data Analyst

Languages : English – French
📍 Montréal QC, Canada

ABOUT ME

My name is Corentin Le Guen, with **9 years of experience** in software development, primarily in the banking industry, I specialize in creating robust and scalable solutions for complex business needs. My expertise spans back-end development, real-time data processing, cloud deployment, and data analytics.

Throughout my career, I've contributed to the modernization of architectures, the development of critical applications, and the implementation of cutting-edge tools to support high-frequency trading and financial analysis. My ability to combine technical proficiency with a strategic mindset has allowed me to deliver impactful solutions that drive performance and innovation.

I thrive in collaborative environments, working across teams to ensure the successful delivery of projects, while also mentoring others and sharing knowledge. Always eager to learn and adapt, I'm passionate about leveraging technology to solve challenging problems and create value.

TRAINING

Data Science & Machine Learning with Python Udemy <i>Online course at udemy.com</i>	2022
Certificate of Language Training in English ACA <i>Online course at lesateliers.ca</i>	2021
Specialization: Programming with Google Go Coursera <i>Online course at coursera.org</i>	2019
Deep Learning National Conservatory of "Arts et Métiers", France <i>Online course</i>	2019
Intermediate R Course DataCamp <i>Online course at datacamp.com</i>	2018

Master degree of Computer Software Engineering (2 years of study) 2018

University of Rouen Normandie, France

Licence Diploma of Development (3 years of study) 2016

University of Rouen Normandie, France

Introduction to C++ Development 2013

Polytechnic School of Lausanne, Swiss *Online course at coursera.org*

Introduction to Java Development 2013

Polytechnic School of Lausanne, Swiss *Online course at coursera.org*

TECHNOLOGIES

Back-end Python, Q/KDB+, Bash

Databases Cassandra, SQLite3, MySQL, PostgreSQL, MongoDB, Redis

Testing Gatling, Mockito, JUnit, Cucumber, Sonar

Tools & Frameworks Flask, FastAPI, Splunk, DataDog, Git, Maven, GitLab / GitHub / Bitbucket, Postman, PyCharm, IntelliJ, Docker, Jenkins

CAREER

Morgan Stanley	From March 2023	To March 2025	2 years
• Develop and maintain tools and applications for data manipulation, visualization, and reporting • Manage dashboard creation and maintenance for trading desks, providing key insights and performance metrics to facilitate informed decision-making • Collaborate with cross-functional teams to gather requirements, design data-driven solutions, and implement scalable data pipelines • Utilize KDB/Q for real-time data processing, querying, and analysis to support high-frequency trading strategies • Conduct comprehensive data audits and quality assessments to ensure data integrity and reliability • Generate actionable insights through exploratory data analysis and develop data-driven recommendations to optimize business processes and mitigate risks <i>Stack: Q/KDB+, Python, BitBucket, TeamCity</i>			

FX Innovation	From August 2021	To March 2023	1 year and 7 months
Client: Desjardins	Senior Java Developer & Tech Lead		
• Tech lead in the modernization team of Desjardins • Java/Spring API for Oracle security • Deployment on Weblogic and Microsoft Azure • Participate to modernize the architecture • Update / maintain an app to process files with Java/Spring • CI/CD on BitBucket / GitHub and Concourse • Testing with JUnit, Cucumber, Gherkin and Sonar • Project management with Jira and Confluence for documentation • Agile environment Stack: Java, Spring, Swagger, Git, BitBucket, GitHub, Sonar, JUnit, Cucumber, Gherkin, Concourse, Postman, Newton			
Systematix	From September 2019	To August 2021	11 months
Client: National Bank of Canada	Senior Fullstack Developer		
• Maintain apps with NodeJS • Deployment with Ansible and Terraform • Tests with Axios, Mocha and Sonar • App monitoring with Splunk and DataDog • Update of Dockerfiles • Installation and OpenText Exstream for document generation • Deployment scripts update with VI on Linux servers • CI/CD on BitBucket, Jenkins, Terraform on OpenShift • Agile team Stack: NodeJS, FeathersJS, Express, Axios, Mocha, OpenShift, Jenkins, BitBucket, Ansible, Nexus, Vault, Jira, Confluence, Bash, Linux, VI, Docker, Dockerfile, Sonar, Splunk, DataDog, PostgreSQL, Postman, OpenText Exstream, Control-M, MFT			
Client: McGill University	Fullstack Developer		
• Maintain a RabbitMQ app with Java and JUnit • Add a security layer on API Connect • Create an algorithm and an app to confront JSON files with JQuery • Deploy on OpenShift and GitLab Stack: Java, RabbitMQ, JUnit, JQuery, API Connect, NodeJS, Jira, Confluence			

IPPON Technologies (France)	From November 2018	To August 2019	10 months
Client: BNP Paribas	Fullstack Developer		
• Maintain a customer account consultation app on agile/scrum process • Develop a Java, Spring app • Create producers and consumers Kafka • Upgrade Cassandra data models • Testing with JUnit and Cucumber • Testing load on servers with Gatling • Help two Java junior developer Stack: Java, Spring, JUnit, Cucumber, Gatling, Kafka, Cassandra, Solr, Git, Jira, Bash, Linux servers			
CGI (France)	From September 2018	To November 2018	2 months
Client: SFR (Phone operator)	Fullstack Developer		
• Migrate ERP (Enterprise Resource Planning) • Migrate Oracle servers • Maintain an app of professional accounts management • Upgrade a Java app (upgrade Java version from Java 6 to Java 8) Stack: Java, Oracle, Git, Bash			
Altitude Infrastructure (France)	From July 2017	To August 2018	14 months
	Developer		
• Application manager for phone operators • Maintain a C# app • Development of a new C# app with .NET • Create a Front-end app to visualize KPI with C# and Bootstrap • Installation of a new ERP (Enterprise Resource Planning) with transcoding tables • Migrate ERP from Adonix to SageX3 • User testing Stack: C#, ASP.NET, Bootstrap 3, JQuery, HTML, CSS, Bash, Git, Redmine, SQLServer			

Saagie (France, intern)	From October 2016	To June 2017	9 months
	Developer		
• Logging app to track customers journey on the website with Java, Hadoop, Cloudera and Hive • Logging javascript library with JQuery • UX/UI improvement <i>Stack: Java, Kafka, Hive, Hadoop, Cloudera, Bash, Javascript, JQuery</i>			

PERSONAL PROJECTS

Project "Lotto 6.49 API"

2022

An API containing Lotto draws since 1982-06-12.

Python3, Flask, SQLite, Docker

More here:

github.com/CorentinLeGuen/lotto-6-49-api

Project "Python on Page"

2022

Running Python on browser using WebAssembly.

Python3, Flask, WebAssembly

More here:

github.com/CorentinLeGuen/python-on-page
python-on-page.herokuapp.com

Renew project "Le Compte est Bon"

2022

Renew the project from 2013 with new technologies to solve the algorithm.

Python3

More here:

github.com/CorentinLeGuen/le-compte-est-bon

Project "Scrap and analyse"

2021/2022

A project to scrap data from websites and analyse them to predict next incoming update. Project hosted on a VPS (Virtual Proxy Server) on Linux.

Python3, Pandas, BeautifulSoup4, Flask, Bash

Project "arraylist" in Go**2020**

A project made in Go to provide a Java arraylist implementation like.
This project have been cloned more than 250 times and have 1 fork.
Go

Code source here :

<https://github.com/CorentinLeGuen/arraylist>

Project "Simple KeyLogger"**2020**

A small project to save input keys into a log file.
Python3

Project "Where is ISS?"**2018**

A front-end project to track the ISS position on earth globe.
Javascript, JQuery, PlanetaryJS

Technology used:

<https://miniature.earth/demo/space-view.htm>

Project "Le Compte est Bon"**2013**

Create an algorithm to solve the game and a GUI with GTK.
Made with Python2 and PyGTK.
